

PLUGS AND RECEPTACLES

RELATED STANDARDS

FAA : Plugs and receptacles are in accordance with FAA specifications AC 150/5345-26B L-823

APPLICATIONS AND FEATURES

Primary cables used in airports are single-cored thus they are supplied with plug and receptacle in order to reduce installation time. EMA has been working in this area for many years and produces factory moulded plugs and receptacles as well as with connector kits to be combined on site.
